---

Hi Shawn,

I am in Colorado dealing with some health issues with my elderly mother, but I will get a hold of Tim Kresse (USGS-AR) to contact Jean to see when the next round of sampling will happen.

Thanks.

**Subject:** Split sampling with McKesson for Arkwood Site

---

Kent: Please contact Jean Mescher , Director of Environmental Services for McKesson, for split sampling at the next event. Jean will put USGS through to the on-site contractor who does the treatment of the new Cricket Spring. Please contact Jean Mescher at [jean.mescher@mckesson.com](mailto:jean.mescher@mckesson.com) and telephone at 608-848-4134 in Wisconsin.

I believe the professional in-charge of O&M at Arkwood is Mr. James Flee of Oxford Environmental & Safety.

USGS will get the contact, the authorization for split sampling, and lab parameters for testing from Jean Mescher
